How to use the tool for company purposes – Business Solutions

Users' Requirements:

- Security of data an important issue
- Reliable / credible data
- Customization according to individual needs
- Methodology – Detailed information on calculation methods needed
- Data quality / verification – to comply with requirements of chartered accountants

Items for EcoTransIT:

- Emphasize data handling / data security
- Clearly point out flexibility of EcoTransIT World
- Inform about regular update of database in close cooperation with an independent institute (IFEU)
- Integrate an automatic data quality check
