

Conclusions

Workshop D Logistic Chains

Topics discussed

- Data collection – a big issue for carriers
- Certification of data and methodologies – 2 separate issues in future?
- Is EcoTransIT the right tool for parcels' shipment accounting?
 - ▲ accuracy
- Environmental impact of hubs and warehousing can be important
- Include time and costs

How to use the tool

- Customer requests to shipping companies
 - Provide green solutions to win tenders
 - Company calculation for reporting
 - Overseas / extra-European transports calculation
 - Data input for ISO 14000 certification of supply chain
 - Supporting companies complying with standardization requirements
 - Can be used to combine costs, time and environment performance
 - Can be used to improve the routing plan
- Can be used with company-based values instead of default !
