countries covered

Taking action with the logistics and transport sector

“As a transport and Logistics company, we are part of the issue of global warming, yet as a responsible company, we are also part of the solution and we intend to play that role.”

Marie-Christine Lombard, CEO .

Our Emission Reporting Services

Why EcoTransIT ?

- **Why ETW ?**
 - Any Geography and any business covered
 - A dynamic tool (evolutions with the input from its members, evolution with the standards, ...)
 - Support and validation from scientific experts to confirm the methodological choices
 - Not only GHG/CO₂ emissions but also pollutants
 - Alignment with the EN 16258
 - Capacity of data processing in line with our requirements
- **Why EWI?**
 - Share and capitalize on acquired experiences
 - Take part to strategic decisions
